Prioritization of Bugs

	Bug Description	Priority	Severity	Rational
Bug#1	Clicking on view deal redirects user to a wrong OTA item landing page	Urgent	Critical	This defect is impacting the core function of trivago CTC and will redirect the guest to wrong URL which is very bad reputation for trivago
Bug#2	Pagination on search results page doesn't work	High	Major	This defect is important to be fixed as the customer can search and filter but with limited results as the guest will see only one page and limited results
Bug#3	Country flag for US is wrong	High	Minor	It can be confusing for the guests but the guests still can search by Name and location that's why it is high priority and minor in Severity
Bug#4	Price filter returns incorrect results	Urgent	Major	This Bug is Urgent to be fixed as it is one of the core feature of trivago (which is finding the best hotel with the lowest price) And if it is returns wrong prices so the guest will lose interest to continue searching because this broken feature
Bug#5	Sorting by Distance doesn't work	Urgent	Major	This bug is urgent and critical as sorting by distance is very important to the guests and had very bad impact to the guest. As the Guest will not be able to choose hotels based on distance.
